Project Statement for Milestone 1

You team name

Team members' names

In this report you should prepare a brief summary of your project. Your report should cover the following subtopics and answer the questions listed:

1. Problem Statement:

   a. Give a formal description of the project. What's the input and output of the problem?

   b. Why the problem you want to address is important? What's its application?

   c. Specify the goal you want to achieve (a new problem, improvement for algorithms, and/or a thorough experimental evaluation of existing algorithms).

2. Team:

   a. Who are the team members?

   b. What knowledge and skills do the team have from previous courses, projects or internships?

   c. What will be each team member's roles and responsibilities in the current project?

3. Dataset and Tools:

   a. Give the link and description of the dataset.

   b. Briefly state what tools you are considering for implementing the project.

4. Project Progress and Contributions:

   - What have you done for preparing the data sets?

   - List each team member's contribution during Milestone 1.

   - What's your plan for Milestone 2?
